VisuLyte™ VL-V8-72 shown

VisuLyte™ Automated Music Visualizer operates as a fully automatic 12 animation light show. No Direct control is needed, let the music take control. The VisuLyte™ product series is offered in different sizes and configurations to fit most venues. VisuLyte™ exclusive high-energy ultra-bright light patterns react to audio with it's integrated AGC microphone. Just mount, plug-in, no programming or setup.

VisuLyte™ is fully automatic updating it's patterns based on the audio loudness, frequency and beat. In addition each of the 12 patterns will react with changing color, motion and brightness to visualize all the music's subtleties. Units operate independently of each other creating a very interesting visual experience. With 20K Lumens (V8-72) great for stage lighting events. DJ's and bands can have a easy to setup light show to really see the music in real-time!

Available in multiple sizes from Semi-Circle to Full-Circle configurations.
